## Panasonic ideas for life

## FEATURES

- Compact and high-capacity 25 A load switching
- Wide line-up
- Pin in Paste compatible model added

TYPICAL APPLICATIONS

- Power windows, Auto door lock, Electrically powered mirrors, Power sunroof, Powered seats, Lift gates and Slide door closers, etc. for DC motor forward/reverse control circuits

## RoHS compliant

Notes: *1. This value can change due to the switching frequency, environmental conditions, and desired reliability level, therefore it is recommended to check this with the actual load.
*2. The upper operation ambient temperature limit is the maximum temperature that can satisfy the coil temperature rise value. Please refer to "Usage ambient condition" in CAUTIONS FOR USE OF AUTOMOTIVE RELAYS. Please inquire if you will be using the relay in a high temperature atmosphere ( $110^{\circ} \mathrm{C} 230^{\circ} \mathrm{F}$ ).
*3. Depends on connection conditions. Also, this does not guarantee repeated switching. We recommend that you confirm operation under actual conditions.
*4. Part numbers for electric discharge lamp loads or any other lamp loads and for capacitor loads only consist of "ACTB*L**".
When using the lamp control type, connect N.O. to the " + (plus)" side. Please contact us for details.
*If the relay is used continuously for long periods of time with coils on both sides in an energized condition, breakdown might occur due to abnormal heating depending on the carrying condition. Therefore, please inquire when using with a circuit that causes an energized condition on both sides simultaneously.

## NOTES

Usage, transport and storage conditions

1) Ambient temperature, humidity, and atmospheric pressure during usage, transport, and storage of the relay:
(1) Temperature: -40 to $+85^{\circ} \mathrm{C}-40$ to $+185^{\circ} \mathrm{F}$ (Standard type)
-40 to $+110^{\circ} \mathrm{C}-40$ to $+230^{\circ} \mathrm{F}$ (High heat-resistant type/Pin in Paste type) (2) Humidity: 2 to 85\% RH (Avoid freezing and condensation.)
(3) Atmospheric pressure: 86 to 106 kPa The humidity range varies with the temperature. Use within the range indicated in the graph below. (Temperature and humidity range for usage, transport, and storage)
